To,
WHOMSOEVER IT MAY CONCERN

Re: RoHS COMPLIANCE

Tubacex Durant Inc. is the manufacturer of seamless tubing in stainless steel. Tubacex Durant adopts the cold drawn process in manufacturing of these tubing.

The Restriction of Hazardous Substance (RoHS) Directive 2002/95/EC, implemented by the European Commission, aims at restricting certain dangerous substance commonly used in electronics and electronic equipment. The Component is tested for Lead (Pb), Cadmium (Cd), Mercury (Hg), Hexavalent Chromium (Hex-Cr), Polybrominated biphenyls (PBB) and Polybrominated diphenyl ethers (PBDE). For Cd the restriction is 100 ppm max. of the substance by weight and for Pb, Hex Cr, PBB & PBDE the restriction is 1000ppm max. of the substance by weight. The Hg must not have been intentionally added.

Tubacex Durant Inc. produces metallic tubing only and so the requirement of PBB & PBDE is not applicable. Tubacex conducts periodic test on its tubing to confirm compliance. The latest test 8/20/2021 has revealed the following results:

Element	TP304/304L	TP316/TP316L	TP321
Lead (Pb)	15 ppm	4 ppm	13 ppm
Cadmium (Cd)	< 1 ppm	< 1 ppm	< 1 ppm
Mercury (Hg)	< 1 ppm	< 1 ppm	< 1 ppm
Hexavalent Cr (Hex-Cr)	< 1 ppm	< 1 ppm	< 1 ppm

Based on the above results, tubing produced by Tubacex Durant is RoHS Compliant.

Sincerely,

Eduardo Correa
Quality Manager
